BiRadio Internet Radio Player

We have established an internet radio portal in Hong Kong, User can access this portal via web browser, internet radio software and PC-free internet device. BiRadio internet radio player is a freeware running on PC which has on-line search feature and support chinese stations information display.

We develop this freeware for our potential customer who can use this PC application to enjoy our internet radio information.

Main function:

- Internet radio player
- Favorite station list management
- On-line radio station search function(by location/language/genre/keywords)
- Chinese information for mandarin/Cantonese/Minnan hua stations

Screenshots:
